#### **DETAILED ACTION**

#### Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

## **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 16 of U.S. Patent No. 6,798,313. Although the conflicting claims are not identical, they are not patentably distinct from each other because the structure and functional of both claim 1 and claim 16 of 6,798,313 are similar.

### Allowable Subject Matter

Claim 2 is allowable. The following is a statement of reasons for the indication of allowable subject matter. The prior art fails to teach or suggest A MMIC that MMIC is configured to receive the DC bias feed, from off the MMIC, directly at the RF matching structure.

Claim 3 is allowable. The following is a statement of reasons for the indication of allowable subject matter The prior art fails to teach or suggest a MMIC that the DC bias feed is not received to the MMIC at the edge of the.

Claim 4 is allowable. The following is a statement of reasons for the indication of allowable subject matter. The prior art fails to teach or suggest a MMIC that RF matching structure is prepared with an ohmic material to receive a bias feed directly from off the .

Claims 5-6 are allowable. The following is a statement of reasons for the indication of allowable subject matter. The prior art fails to teach or suggest a MMIC that is configured a transistor configured to receive a bias feed and a RF matching structure is prepared with a material to receive said bias feed from a direction out of the plane of the MMIC chip.

Claims 7-8 are allowable. The following is a statement of reasons for the indication of allowable subject matter. The prior art fails to teach or suggest a method that configured a dc bias is electrically communicated via a bond wire that is coupled directly to said RF matching structure and blocking unwanted RF signals with bond wire.

Art Unit: 2819

Claims 9-10 are allowable. The following is a statement of reasons for the indication of allowable subject matter. The prior art fails to teach or suggest a MMIC that MMIC is configured receive a bond wire at an interior portion of a reduced size MMIC.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAM T. MAI whose telephone number is (571)272-1807. The examiner can normally be reached on 6:00 am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Pascal J. Robert can be reached on (571) 272-1769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
